

Appl. No. : 09/850,263
Filed : May 7, 2001

REMARKS

By this Amendment, Applicants have revised the application as follows:

- The limitations of objected-to Claim 105 have been added to independent Claim 97 (with “a plurality of items” changed to “multiple items” to avoid possible indefiniteness issues), and Claim 105 has been canceled.
- The limitations of object-to Claim 117, including intervening Claims 115 and 116, have been added to independent Claim 114, and Claims 115-117 have been canceled. Applicants have also added the term “target” in line 21 of Claim 114 to provide antecedent basis for the later recitation of “target users.”
- Objected-to Claims 122 and 124 have been rewritten in independent form.
- The specification has been amended to make the “summary” section generally commensurate with the invention as claimed, in accordance with 37 C.F.R. 1.73.

No new matter has been added by this Amendment.

Concurrently with the submission of this Amendment, Applicants are electronically filing a Supplemental IDS to submit U.S. Patent No. 6,629,079 for consideration. This patent is owned by the assignee of the present application, and issued from the application referenced at page 7, line 11 of the present application.

In view of the foregoing amendments and remarks, Applicants submit that the application is now in condition for allowance. If, however, any issues remain, the Examiner is invited to call the undersigned representative at the number listed below.

Respectfully submitted,

KNOBBE, MARTENS, OLSON & BEAR, LLP
